TRẦN QUỐC TẤN

Backend Developer

contact.tantranquoc@gmail.com | +84 364 413 137 | linkedin.com/in/tantranquoc/

ABOUT

Backend Developer with 4 years of experience building and maintaining backend services, with a primary focus on Go and microservice-based systems. Hands-on experience with REST and gRPC APIs, PostgreSQL, MongoDB, and Kubernetes environments. Worked across healthcare, insurance, e-commerce, and gaming platforms, integrating external and legacy systems, and deploying through existing CI/CD pipelines. Comfortable using AI-assisted development tools to speed up day-to-day coding, testing, and documentation. Collaborates well with clients, stakeholders, and cross-functional teams in Agile (Scrum) environments.

SKILLS

Languages: Go, TypeScript, SQL

APIs & Architecture: REST, gRPC, GraphQL, Microservices

Databases: PostgreSQL, MongoDB, Redis

Infrastructure & Delivery: Docker, Kubernetes, CI/CD, Azure DevOps, Git

Practices & Tools: Unit Testing, Code Review, Agile/Scrum, AI-assisted Development (OpenCode, ClaudeCode, Copilot)

WORK EXPERIENCES

Backend Developer - B2B Gaming Platform 2025 - Sep 2026
Mercury Studio

Developed backend capabilities for a B2B platform composed of Go microservices.

- Contributed to payment services for deposit workflows, including payment gateway integration, transaction processing, and reconciliation.
- Developed REST and gRPC APIs features consumed by web applications.
- Built an automated reporting workflow generating PDF reports (Playwright-Go) and delivering them via S3-hosted links on a schedule.
- Maintained Go microservices backed by PostgreSQL and MongoDB, investigating cross-service issues and troubleshooting defects.
- Used AI-assisted tools (Open Code, Claude Code, Copilot) to speed up code generation, documentation, and testing.

Tech stack: Go, gRPC, REST, PostgreSQL, MongoDB, Redis, Kubernetes.
Team size: 10

Backend Developer - B2B e-Commerce Platform (Pharmaceutical) 2023 - 2025
FPT Software

Developed a B2B e-commerce platform that simplified pharmaceutical order processing and distribution on top of an existing SAP ERP system.

- Engineered and maintained backend services for medication ordering, distribution logistics, promotional campaigns, product returns, and invoice generation.
- Developed REST and GraphQL APIs within a microservice architecture to support the frontend application and maintain clear service boundaries.
- Collaborated with business analysts and the product owner to translate requirements into technical solutions, supported by unit testing, debugging, and code reviews.

Tech stack: Go, GraphQL, PostgreSQL, Azure, GCP, Camunda, Microservices.
Team size: 20 | Methodology: Agile (Scrum)

Backend Developer - Digital Insurance e-Contracting Platform 2023 - 2023
FPT Software

Developed a digital e-contracting platform covering package selection, applications, and electronic contract signing while integrating existing workflows with third-party services.

- Engineered REST APIs with NestJS, TypeScript, and TypeORM for the e-contracting workflow from questionnaire submission through approval.
- Integrated legacy systems with third-party services to maintain data flow and continuity of existing processes.
- Implemented unit tests and managed MySQL schema migrations to support system reliability and iterative feature delivery.

Tech stack: NestJS, TypeScript, TypeORM, MySQL, AWS S3, REST, Microservices.
Team size: 15 | Methodology: Agile (Scrum)

Software Developer - MRI System 2022 - 2023
FPT Software

Contributed to medical software supporting MRI operation, diagnostic workflows, image processing, and patient record management.

- Developed software to support reliable operation of MRI medical devices.
- Performed diagnostics, troubleshooting, and maintenance to improve system reliability.
- Automated workflows by building tools and scripts with VBA and C#.

Tech stack: C#, VB.NET, VBA.
Team size: 15 | Methodology: Waterfall

EDUCATION

Ho Chi Minh City Open University 2018 - 2022
Bachelor of Information Technology

CERTIFICATES

Professional Scrum Master I - Scrum.org Sep 2023

LANGUAGES

English - Good working proficiency; able to communicate with clients and team members in daily work

SIDE PROJECTS

K3s Homelab - Kubernetes, GitOps, K3s, Docker, GitHub Actions
A personal Kubernetes environment for self-hosting and deploying applications.

- Built and operated a K3s homelab to deploy containerized applications and gain hands-on experience managing self-hosted infrastructure.
- This résumé is one of my side projects, with CI/CD automated through GitHub Actions and Argo CD. It's hosted on a single-node K3s cluster running on my home PC and accessible at https://quoctan.io.vn
