TRẦN QUỐC TẤN

Backend Developer

contact.tantranquoc@gmail.com | +84 364 413 137 | linkedin.com/in/tantranquoc/

ABOUT

I am a Backend Developer with almost 4 years of experience building web applications and distributed systems, primarily using Go. I have experience designing and developing REST, gRPC, and GraphQL APIs, microservices, and backend services with PostgreSQL, MySQL, MongoDB, and Kubernetes. Throughout my career, I have worked on projects in healthcare, insurance, e-commerce, and gaming platforms, integrating external and legacy systems, delivering maintainable backend features, and deploying applications through existing CI/CD pipelines. I also collaborate closely with clients, stakeholders, vendors, and cross-functional teams in Agile (Scrum) environments to translate business requirements into reliable technical solutions.

SKILLS

Technologies: Go Programming Language, Microservices, Kubernetes, PostgreSQL

WORK EXPERIENCES

Backend Developer - B2B Gaming Platform Dec 2025 - Sep 2026
Mercury Studio

Developed backend capabilities for a B2B platform composed of Go microservices.

- Implement payment services for deposit workflows, including payment gateway integration, transaction processing, and reconciliation.
- Built REST and gRPC APIs for configuring marketing banners consumed by web applications.
- Implemented scheduled invoice report delivery by collecting source data, rendering multi-page PDFs with Playwright-Go, uploading generated files to S3, and injecting report links into emails.
- Maintained Go microservices backed by PostgreSQL and MongoDB, investigating cross-service issues and troubleshooting defects.
- Applying AI to enhance development efficiency, including code generation, documentation, and testing.

Tech stack: Go, gRPC, REST, PostgreSQL, MongoDB, Redis, Kubernetes.
Team size: 10

Backend Developer - B2B e-Commerce Platform (Pharmaceutical) 2023 - 2025
FPT Software

Developed a B2B e-commerce platform that simplified pharmaceutical order processing and distribution on top of an existing SAP ERP system.

- Engineered and maintained backend services for medication ordering, distribution logistics, promotional campaigns, product returns, and invoice generation.
- Developed REST and GraphQL APIs within a microservice architecture to support the frontend application and maintain clear service boundaries.
- Collaborated with business analysts and the product owner to translate requirements into technical solutions, supported by unit testing, debugging, and code reviews.

Tech stack: Go, GraphQL, PostgreSQL, Azure, GCP, Camunda, Microservices.
Team size: 20 | Methodology: Agile (Scrum)

Backend Developer - Digital Insurance e-Contracting Platform 2023 - 2023
FPT Software

Developed a digital e-contracting platform covering package selection, applications, and electronic contract signing while integrating existing workflows with third-party services.

- Engineered REST APIs with NestJS, TypeScript, and TypeORM for the e-contracting workflow from questionnaire submission through approval.
- Integrated legacy systems with third-party services to maintain data flow and continuity of existing processes.
- Implemented unit tests and managed MySQL schema migrations to support system reliability and iterative feature delivery.

Tech stack: NestJS, TypeScript, TypeORM, MySQL, AWS S3, REST, Microservices.
Team size: 15 | Methodology: Agile (Scrum)

Software Developer - MRI System 2022 - 2023
FPT Software

Contributed to medical software supporting MRI operation, diagnostic workflows, image processing, and patient record management.

- Developed software to support reliable operation of MRI medical devices.
- Performed diagnostics, troubleshooting, and maintenance to improve system reliability.
- Automated workflows by building tools and scripts with VBA and C#.

Tech stack: C#, VB.NET, VBA.
Team size: 15 | Methodology: Waterfall

EDUCATION

Ho Chi Minh City Open University 2018 - 2022
Bachelor of Information Technology

CERTIFICATES

Professional Scrum Master I - Scrum.org Sep 2023

LANGUAGES

English - Good working proficiency; able to communicate with clients and team members in daily work

SIDE PROJECTS

K3s Homelab - K3s, Kubernetes, Docker, GitHub Actions, GHCR, GitOps, Nginx
A personal Kubernetes environment for self-hosting and deploying applications.

- Built and operated a K3s homelab to deploy containerized applications and gain hands-on experience managing self-hosted infrastructure.
- Containerized this resume with a multi-stage Docker build and unprivileged Nginx, then automated GHCR image publishing and GitOps manifest updates through GitHub Actions.
